

## Incident Notification

**Incident Date:** February 27, 2022

**Title:** Significant Medical Incident

**Description:** A worker was relocating a condensate line in the Acid Plant at McClean Lake operation. While moving the pipe, the worker stepped back and inadvertently stepped into the hot condensate sump. Their foot and lower leg were briefly immersed.

**Resolution:** The worker sustained burns to their right lower leg and foot. The injury is currently classified as a medical incident but has the potential to become a lost time injury (LTI). The worker immediately reported to the nurse for treatment. The investigation is ongoing. Provincial and federal regulators were notified.
