

Incident Notification

Incident Date: July 11, 2021

Title: **Contaminated Slurry Tote**

Description: Two empty contaminated slurry totes from McClean Lake were received at Cigar Lake. Potential contamination was identified by Cigar Lake staff, who then confirmed the presence of removable contamination exceeding the allowable non-fixed contamination limit for transport.

Resolution: No effects on health, safety or the environment. McClean Lake was informed and the operation fixed the leaking pipe that caused the contamination. The ore slurry totes were cleaned at Cigar Lake. The CNSC was notified.
